Mortuza Karzon

Web Application Developer(React & Node)

Bangladesh

Summary

As a Full-Stack Web and Software Developer, I have a strong understanding of a variety of web-based technologies and tools. I am proficient in Front-End Web Development, using HTML 5, CSS 3, Bootstrap 4, Javascript ES6, DOM Manipulation, jQuery, and React.js to create engaging and user-friendly web experiences.

I also have extensive experience in Backend Web Development, using tools such as Node.js, NPM, Express.js, EJS, and REST APIs to build robust and scalable server-side applications. In addition, I am skilled in working with databases, including SQL and MongoDB, and using Mongoose to model and manipulate data.

I am also proficient in a range of other technologies, including authentication, deployment with GitHub Pages and Heroku, and version control with Git and GitHub. I am comfortable using the Bash command line and am always looking to learn and stay up-to-date with the latest tools and technologies.

Overall, I am confident in my ability to use these tools and technologies to create high-quality web and software applications that meet the needs and goals of my clients. Whether it's building a simple website or a complex software system, I am ready to put my skills to work and help bring your project to life.
